

Census of South Australian plants, algae and fungi: Fungi

Version 6.0 – 14 Sep. 2024

The 5th edition of the *Census of South Australian vascular plants* was published as hardcopy in 2005. Since then it is maintained in a database and was until recently available online through the eFloraSA website.

The Census is administered and edited by members of the State Herbarium of South Australia (AD): P.J. Lang, J. Kellermann, T.A. Hammer & M. Waycott.

This is an interim PDF version of the authoritative plant list for the State, while the online version is unavailable. Updated versions will be published as necessary.
